MARKETABLE PHOSPHATE ROCK IN JULY 2002

U.S. marketable phosphate rock production in July 2002 increased 1% from the prior month, according to the U.S. Geological Survey (USGS). Annualized production for the year was 35.2 million metric tons, which was about 10% higher than total production in 2001.

Domestic phosphate rock sold or used for July increased 8% from the prior month, to 3.1 million tons. Annualized sales or use for the year was 35.1 million tons, which was about 7% higher than the total for 2001. U.S. producer ending stocks for July were 3% higher than the figure shown in June.

Some phosphate rock import data for Morocco were suppressed by the U.S. Census Bureau. U.S. import tonnage was estimated by USGS to average 208,000 tons per month, in 2002. July import data were not available at the time of publication.

Annualized domestic consumption for 2002 was calculated to be 37.6 million tons, using annualized sold and used data and estimated trade data. Apparent domestic consumption for 2001, calculated from the sum of home deliveries and adjusted trade data, was 35.2 million tons.
